

# VASIM

---

Versatile Advanced Ultrasound Simulator

# Create your own Ultrasound Simulator

## Versatility

Using VAUSSIM you will be able to transform every simulator into an Advanced Ultrasound Simulator.

## Editor

Easily create your own casebook in order to create your exclusive and unique Simulator.

## Multimedia Content

Display images, videos and volumes without restriction.

## Mobility

View the instructor interface on any device with an internet browser.

The VausSim™ package includes:

- USB drive with Software that includes:
  - an Emergency module with 8 different cases FAST, eFAST and RUSH acquired and validate by universities and scientific associations
  - a realistic “user interface” with integrated controls for the modulation (contrast, brightness, etc.) or the analysis (freeze, measurements, etc.) of the image
  - a user friendly browser based “instructor interface” that can be used on PC, tablet, smartphone connected via network to the user interface and allows to use VausSim during advanced simulation scenarios
- Set of 3 different realistic probes (convex, linear and phased array), including pressure sensor and a bright LED for orientation of probe
- Set of 20 RFIDs (sensors that can be placed anywhere on the simulator directly by the instructor in order to create new ultrasound scanning points)

VausSim™ is a Versatile Advanced Ultrasound Simulator, designed to make diagnosis on move.

The VausSim™ ultrasound simulator, thanks to a network of high-fidelity sensors, makes the skin of any simulator or manikin ultrasound scannable also in mobile settings. This simulator allows the instructor to independently create, through the use of a powerful editor, a customized and exclusive casebook of real US images/videos/volumes without any additional cost.

Thanks to an innovative technology, the simulator allows to change the pathological ultrasound status of the patient in real time during the scenarios. VausSim™ is also completely independent and not sensitive to magnetic field rumors and guarantees continuous functioning also during transportation and movement of the patient.

VausSim™ is a patented product from Accurate, a company blending international experience, scientific research, engineering and development of truly effective hi-tech educational solutions in the medical field.

VausSim™ Optionals:

- Abdominal1 Module (8 cases)
- Pleural1 Module (8 cases)
- Cardiac1 Module (8 cases)
- ...more to come
